Schindler 6000 Plus (Inclusive of ES5)

A RePlace solution for your existing elevator

Jardine Schindler

Schindler

With a Schindler
6000
Plus,
the sky's
the limit

With the latest technologies, high-end finishes, larger capacities and flexibility for custom design options – Schindler 6000 Plus delivers a first-class ride. Our Swiss-engineered materials and components have been developed to deliver superior performance and energy efficiency in existing buildings. The Schindler 6000 Plus gives your building a greener outlook on life.

Schindler RePlace
Modernization solutions to keep passengers moving

With almost 150 years designing, manufacturing, and installing elevators, we understand how to transport people and loads safely and reliably. Our experience helps us understand and address the particular requirements and the unique challenges that an elevator modernization presents. With Schindler, enjoy the hassle-free and efficient modernization of your existing equipment.

Swiss-precision engineering

Like any technical product, elevators are also subject to a life cycle. Elevator equipment and components will eventually wear down, requiring upgrades to maintain the performance and reliability of the system. So we're using our Swiss-precision engineering and globally renowned expertise to provide you with the best elevator modernization solutions.

Solutions for every building

Our Schindler 6000 Plus is just one of our RePlace elevator solutions.

We have several Schindler RePlace options available – Schindler 3000 Plus, Schindler 5000 Plus, or Schindler 6000 Plus – to meet the requirements of your specific building and the existing equipment.

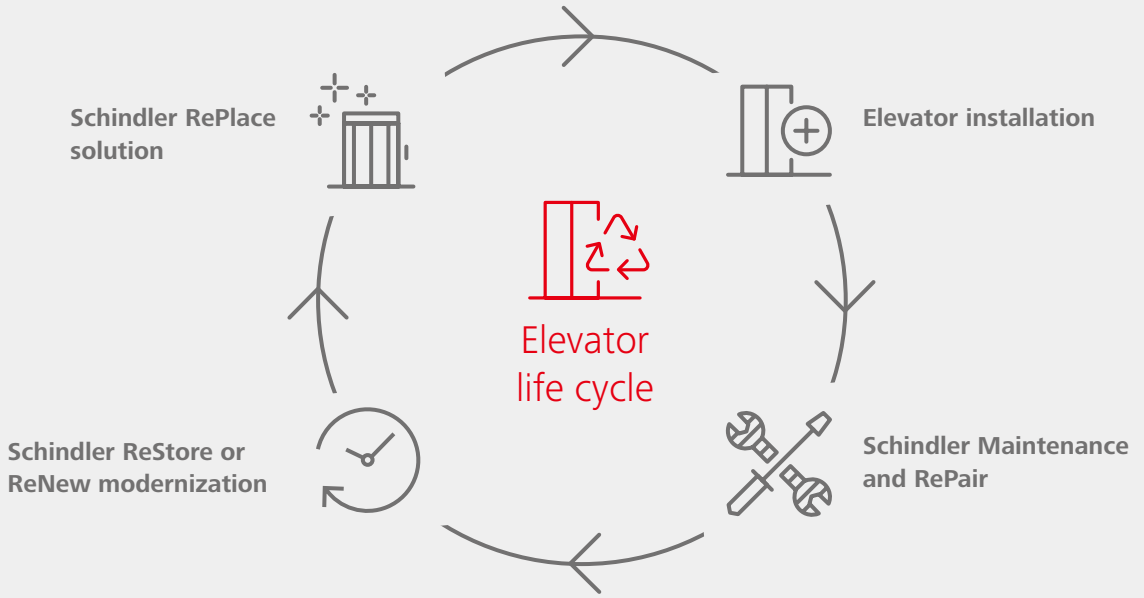
New elevator, existing hoistway

A Schindler RePlace modernization introduces a completely new elevator into the existing hoistway space.

By fully replacing your existing system, your building benefits from the latest safety standards and leading energy-efficient technologies, allowing you to reduce your carbon footprint and energy costs. And, passengers benefit from a new, fresh elevator.

Enjoy peace of mind

A Schindler RePlace not only increases the reliability and performance of your existing elevator, it also adds value to your existing investment. Maintenance-friendly components and the replacement of obsolete parts reduce the likelihood of equipment downtime. Let us give you peace of mind with our Schindler RePlace elevators.



From design and installation, through to service and modernization, our professionals are there throughout the life cycle of your elevator.

Repair or modernization? Giving your elevator new life

Assessing your elevator
In contrast to a repair, which offers a 1:1 replacement of components, a modernization upgrades components and brings your elevator to a higher standard. The latest regulations, introduced to make your elevator as safe as possible, can be easily met with a Schindler RePlace elevator.

After commissioning, regular maintenance, and repairs, a Schindler modernization will help ensure that your elevators continue to perform optimally for years to come.

Minimize unpredictability
A Schindler RePlace modernization addresses the unreliability and unpredictability associated with older installations, so passengers can enjoy a smooth and uninterrupted journey to their destination. Replacing an obsolete system safeguards against unnecessary downtime due to spare part unavailability – maximizing uptime in the future.

For equipment that is over 20 years old, a Schindler RePlace elevator – the Schindler 3000 Plus, Schindler 5000 Plus, or Schindler 6000 Plus – should be considered to maintain the availability of spare parts, improve equipment performance, and preemptively upgrade components that are reaching their end of life.

Keep passengers moving smoothly, efficiently, and comfortably with a Schindler RePlace modernization

Schindler 6000 Plus
Unique, powerful, and efficient

Schindler 6000 Plus combines high-rise performance with maximum flexibility to help you modernize your building – for any rise up to 150 meters, speed up to 3.0 m/s, and groups up to eight cars. This flexibility also extends to the design, dimensions, configurations, and application range – even addressing the needs of demanding public transit, mixed-use and commercial projects. This premium product offers high-end and robust design solutions to meet the needs of the most ambitious renovation projects around the world.

Schindler 6000 Plus integrates the latest technology, a flexible, durable structure, and the highest quality materials to deliver faster handling times for higher passenger volumes – all with optimum ride quality and greater reliability.

Key figures

Capacity	Max 2600 kg
Travel height	Max 150 m
Stops	Max 50 stops, with a maximum of 80 openings
Speed	Max 3.0 m/s
Machine room	Machine-room, mini-machine room or machine-room-less
Drive system	frequency controlled, eco-friendly regenerative drive technology
Group size	Up to 8 cars, unlimited with Schindler PORT technology
Entrances	One- or two-sided
Energy efficiency classification	Class A, according to ISO 25745-2*

*The classification always refers to a specific customer configuration. Usage pattern, load capacity, customer specific options and site conditions influence the final rating.

First-class ride experience

Superior ride quality and performance. The Schindler 6000 Plus is built around components of the highest quality.

Future-ready

A modernization introduces the latest digital innovations and new technologies to further support the management and maintenance of your equipment into the future.

Efficiency and ecology

Upgraded components and the latest sustainable technologies help to reduce the energy consumption of your equipment.

Flexible integration

The Schindler 6000 can be adjusted to fit the existing hoistway space. Options, such as a reduced headroom and flexible door sizes, minimize the impact to the building.

Future-ready
Schindler elevators designed for next-generation technologies

Our Schindler RePlace elevators allow your passengers not only to enjoy noticeably smoother and quieter operation, but also another level of passenger experience thanks to digitally enhanced mobility. A modernization introduces leading technologies, such as intelligent electronic diagnostics, to further support the management and maintenance of your equipment into the future.

Innovations in installation

Schindler's new **INEX (Installation Excellence)** method not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on-site.

Smart operation – switching to digital

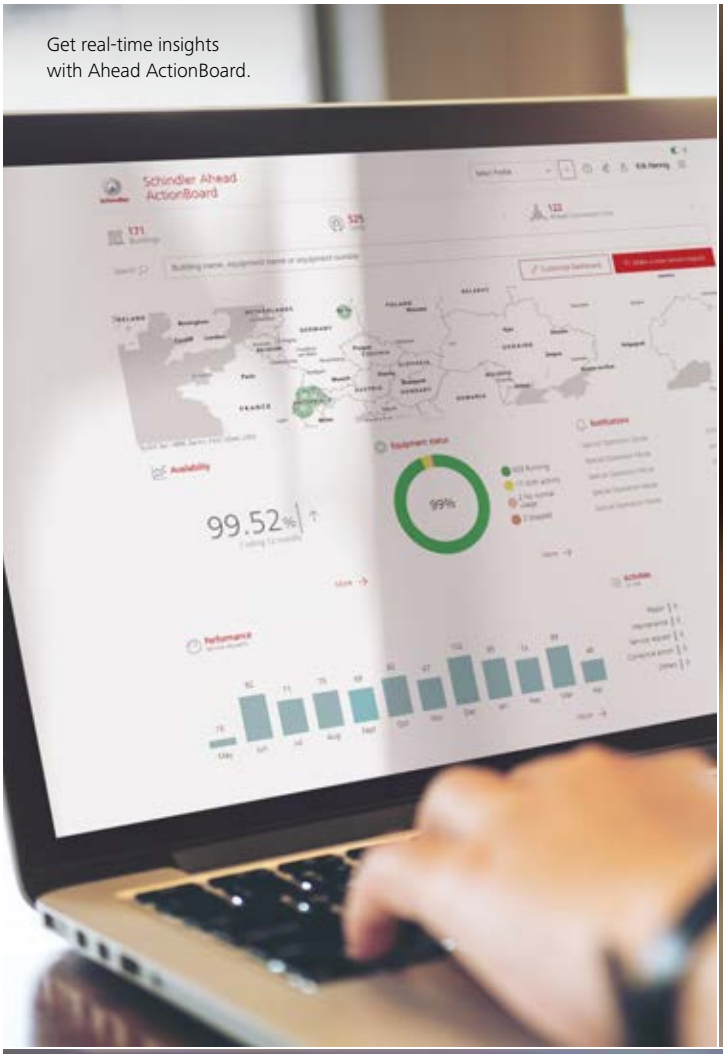
All our elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

– **Maximize uptime with Ahead Remote Monitoring**
With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimize or even avoid downtime.

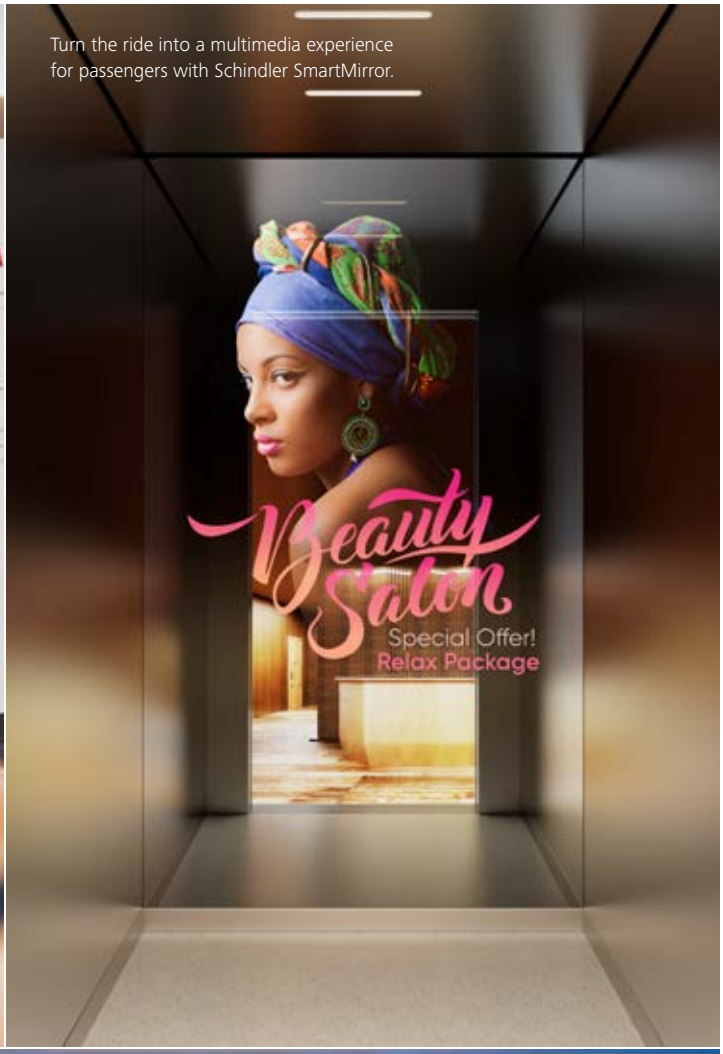
– **Real-time insights with Ahead ActionBoard**
Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

User experience on a next level

Infotainment hub with **Ahead SmartMirror** and **AdScreen**, or transform user-elevator interaction into a unique, visual experience.



Get real-time insights
with Ahead ActionBoard.



Turn the ride into a multimedia experience
for passengers with Schindler SmartMirror.

With valuable and predictive information available in
real-time, preventive actions can be taken more quickly.

Elevating sustainability
Excellent ecological performance

We're constantly working on reducing the environmental impact of our products and services across their entire life cycle. The Schindler 6000 Plus passenger elevator is a uniquely designed product whose parts are perfectly adjusted to fit within the existing hoistway, saving both space and energy.

Class A energy-efficiency rating

Improving the energy efficiency of older buildings is vital to the development of more sustainable cities. Modernizing your existing elevator help to reduce the environmental impact of this equipment in the buildings they serve. Regenerative drive, LED lighting and stand-by mode while parked, are standard eco-friendly features in all Schindler 6000 Plus elevators, aiming to achieve the highest energy-efficiency rating class A, according to ISO 25745-2*.

Environmental Product Declarations (EPD)

To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). We've registered EPDs at the "International EPD® System" for all major elevator product lines. This is an important step in the assessment of the environmental performance of our products and underlines our continuous efforts toward sustainable solutions.

Energy-efficiency rating class A, according to ISO 25745-2*

*The classification always refers to a specific customer configuration. Usage pattern, load capacity, customer specific options and site conditions influence the final rating.

Efficiency and ecology
Architecturally and environmentally friendly

Our Schindler 6000 Plus is designed to combine dimensions, technologies, and options flexibly to blend into and complement your existing building. Make your building more efficient and optimize space through excellent shaft utilization with our scalable car configurations, which minimize the need for additional building works.

1 Flexible layout solutions

– The Schindler 6000 Plus offers flexible configurations depending on your needs. Select from a space-saving machine-room-less (MRL) design, a mini-machine-room, or machine-room option
– The flexible positioning of the counterweight provides more options for perfect space utilization, maximized rentable space and lower building costs

2 Energy-efficient machine

– Lubrication-free, gearless machine supports a smooth ride quality
– Permanent magnet technology offers higher energy efficiency
– Stable start without high peak current, quickly reaches a low energy consumption level

3 Regenerative inverter as standard

– Minimum heat dissipation due to energy recuperation. This minimizes energy consumption and reduces the cooling requirement in the machine room by up to 50%
– Return of regenerated energy to mains power during overhauling mode
– Minimal reactive power thanks to the use of a Power Factor 1 converter

4 Future-ready controller

– Reduced stand-by power improves energy efficiency
– Halogen-free cabling and wiring, available as an option
– Precision stopping accuracy for easy access
– Digitally-enabled for remote maintenance and commissioning to meet the highest quality standards

5 Modular, scalable system

– Scalable car sizing in any direction, in 50 mm increments
– Car heights up to 3200 mm, scalable in 100 mm increments
– Doors can be sized and positioned with millimeter accuracy to reduce the need for costly and timely rework to the building.
– The door width is adjustable in 100 mm increments from 800 to 1800 mm and door height up to 3000 mm, with a choice of telescopic (T2) or center-opening doors (C2, C4) and single or double (through-loading)

6 Hoistway and suspension technology

– STM technology enables a smaller machine compared to conventional steel rope applications
– Compared to steel ropes, the STM is oil-free and does not require regular lubrication
– Roller guide shoes, as an option, improve the ride quality and the efficiency of the elevator, especially while traveling at higher speeds
– A reduced headroom, as an option, ensures the system fits within the available space

The sound of moderate rainfall

Thanks to our high-quality technology and installation methodologies, Schindler elevators generate minimal noise. Most of the noise created by our elevators does not exceed 50 – 60 dB (A).*

*For the evaluation methodology, we comply with ISO 18738 standards. However, many factors influence the amount of noise and vibration generated by an elevator. See our Ride Quality brochure to learn more.

Representative system

Full design freedom –

With the most luxurious finishing options, the Schindler 6000 Plus offers high-end design for even the most prestigious and innovative projects. Still looking for the perfect match for the interior of your building? A bare car enables you to bring your vision to life – design without compromise.

Navona
Functional and durable

Times Square
Modern and versatile

Four design lines
Infinite possibilities

Create the look and feel you like. Combine colors, materials, lighting, mirrors, handrails, and fixtures to achieve the ambiance that fits your building. Choose from one of our interior design lines or design an individual car that fits your needs.

Park Avenue
Sophisticated and elegant

Sunset Boulevard
Inspiring and bold

Navona
Functional and durable

Clarity and comfort in your car with this robust design line. Fresh colors, durable accessories, and the option of several different floors make Navona an excellent choice for residential applications. Elegant stainless steel options are also available for rear and side walls.

Navona

Lighting: Round Spots
Ceiling: Stainless Steel Lucerne Hairline
Walls: Stainless Steel Lucerne Brushed
Car operating panel: Linea 100
Skirting: Protruding Stainless Steel Hairline
Floor: Rubber Speckled Black

Schindler PORT Technology
Best-in-class traffic management

Optimize the way people move around your building. Improve efficiency, reduce energy consumption, and create more satisfying experiences with Schindler PORT – a holistic solution to building transit management.

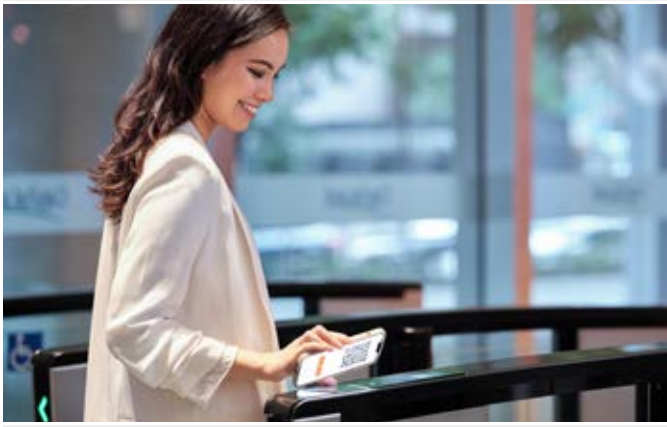
A Schindler PORT upgrade can be implemented as the first step of a more comprehensive modernization to achieve smart mobility in a minimum amount of time. Customers will experience an immediate improvement in traffic flow, even if one car is out of service for the modernization.

Personalized experiences

Customize user journeys based on individual needs and access rights. User-friendly, high-resolution interfaces and touchless operations enhance the experience for passengers.

Highly efficient people flow

Especially suited to large elevator groups or straight-line configurations in heavy-traffic commercial buildings, Schindler PORT can increase handling capacity by up to 25% and and reduce waiting times by up to 20%.



Secure access

Pre-program and control elevator, floor, and room access rights for tenants and visitors from a central location. Lobby speed gates take identification and access control to new heights of efficiency.

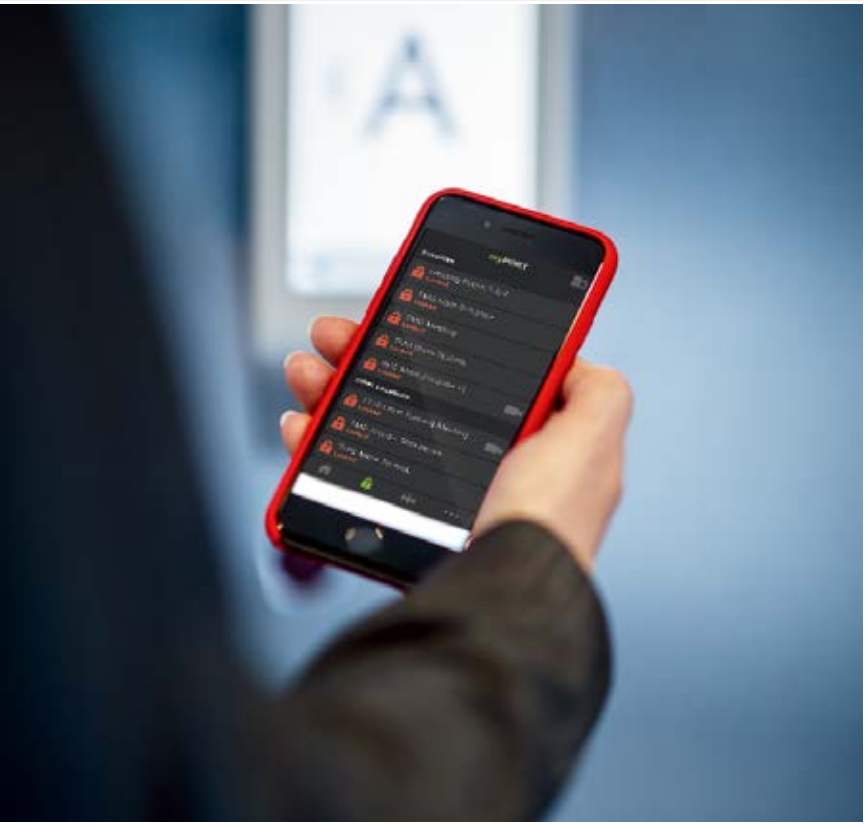
Learn more about PORT Technology

www.jardineschindler.com/port

myPORT

Schindler myPORT is the comprehensive building transit application that puts the power of Schindler PORT Technology into the hands of residents and tenants – in one smartphone app.

Schindler myPORT provides appropriate levels of building access from main entrances and parking garages to offices and apartment doors. For visitors, it's hospitality at its best with a digital invitation giving simple entry and guidance. Occupants can communicate directly with visitors via Schindler myPORT's video intercom system.



Sustainable operations

Elevator energy consumption can be reduced by up to 40%* with Schindler PORT ECO Mode. Schindler PORT can also help reduce the energy usage per capita by up to 20%* - making the solution a smart one for your building and the environment.

*Calculations are in comparison to prior Schindler PORT Technology software releases and refer to a specific customer configuration. Usage patterns, load capacity, customer specific options and site conditions may influence the final calculations.

Schindler PORT Overlay
A seamless and hassle-free modernization

Schindler PORT

Schindler PORT technology – our destination dispatch system – can be installed in place of conventional fixtures on each landing to optimize the performance of an elevator group.

Schindler PORT provides a wide range of destination control and access terminals for visitor management, parking, doors, offices and residences. Combine terminals to produce an aesthetic and functional solution for any building.

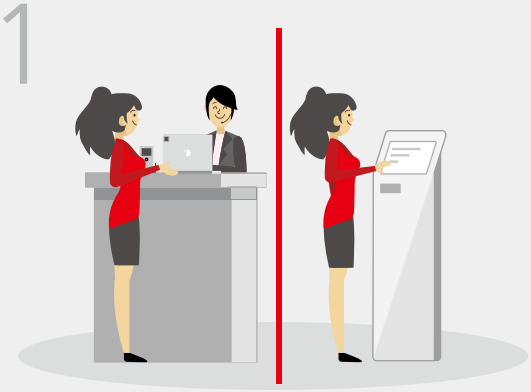
Touchless and secure experience
QR code for seamless elevator access

How does it work for passengers

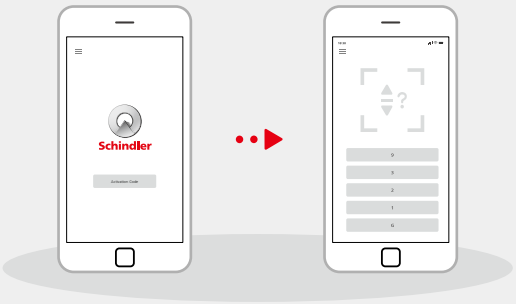
1



Register and download the Schindler's BuilT-In App

- Register at the reception
- Operator will set access rights and validity according to the building's security equirements.
- Download and install the Schindler BuilT-In App on the App Store or Google play store.

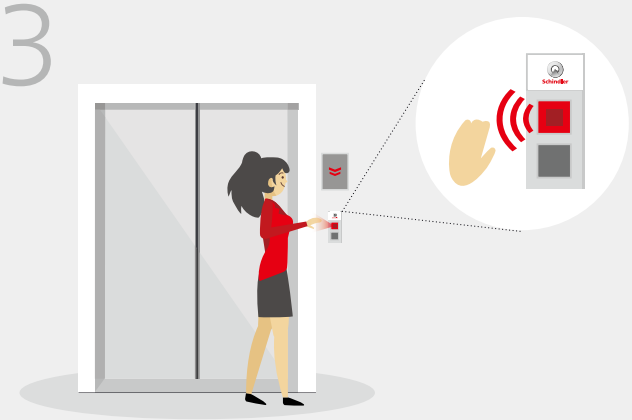
2



Activate app and select desired floor

- Open and activate the app using the provided activation code.
- Select desired floor on the virtual keypad to generate a dynamic QR code.

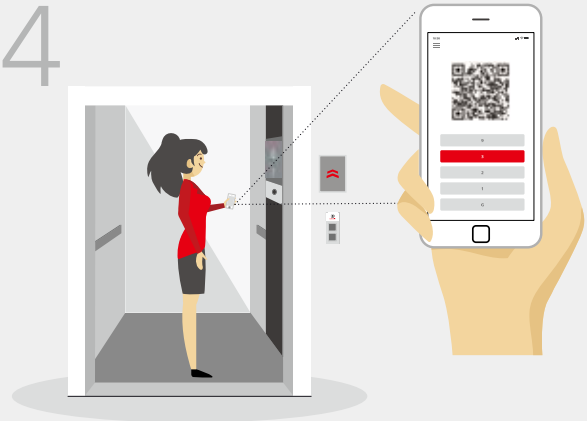
3



With a wave of your hand

- Call elevator by 'waving' at Schindler CleanCall touchless button.

4



Scan the dynamic QR code inside the car

- Hold your phone in front of the QR reader (within 10cm)
- Your destination floor will be registered instantly and appear on the car operating panel.
- You are ready to take off to your desired floor without touching any part of the elevator.

BuilT-In Robot Service Connection
Automate tasks

A futuristic experience

Service robots, a marvel to behold, can transform a building's dynamics. They are highly adaptable to new environments thanks to advanced localisation technologies that create a local map of a building and compute routes that are optimal.

BuilT-In provides integration with robotics applications, so that robots can easily navigate busy building environments, place elevator calls to their destination floors, and request elevator status information.

Benefits at a glance

Real time tracking
With BuilT-In Robot Service Connection, building management can track a robot's location and status in real time, and swiftly respond whenever required.

Mitigate risks ahead of deployment
BuilT-In provides a cloud-based development environment for robotics applications to simulate various scenarios and minimise uncertainties ahead of deployment, for instance to verify that the communications and connection status between elevators and robots are not interrupted.

Seamless links between robots and elevators
The BuilT-In API (Application Programming Interface) creates a communication link between robots and elevators by connecting the elevators' network switch with the local building network or gateway box via WIFI, 4G or 5G, so that robots can effortlessly transit between floors.

Note: Robot's specifications and options are subject to change. All illustrations in this brochure are representative only. The samples shown may vary from the actual product.

Installation excellence
Working with you every step of the way

step 01

Analyze your existing equipment

step 02

Provide an assessment and offer based on your specific needs

step 03

Place order

step 04

Meet to review the complete program of works

step 05

Clarify the on-site accessibility and subcontracting requirements

step 06

Complete the modernization smoothly and efficiently

step 07

Perform a detailed inspection for quality and safety

step 08

Final handover of equipment

Transparent fulfillment process
We partner with you to find the best mobility solution for your facility. By checking the health of your existing equipment, we can determine what solution and components are the best fit for your installation.

To ensure a smooth installation process, we'll meet with you a few weeks before the modernization starts to discuss the final program of work. We'll also clarify storage and access points, and coordinate our activities with any subcontractors on-site so you can enjoy a professional and hassle-free process from ordering to handover.

Efficient installation and future maintenance
Our global competencies and expertise make it sure to minimize building adaptations and optimize the installation process when replacing your elevator, setting new standards in the field. In fact, installing our replacement elevators requires up to 40% less time than a conventional replacement. That means that residents can look forward to minimum disturbance and downtime.

After a Schindler RePlace modernization, your equipment becomes easier to service and troubleshoot. The newly connected elevators enable 24/7 intelligent auto callback service and maintenance. This can reduce downtime by up to 34%*.

Schindler modernization
Various solutions to meet your needs

Are you interested in replacing your elevator with a completely new system? Or, maybe you would like to upgrade individual components? Either way, we have the solution that's right for you.

We have developed various modernization solutions to target the differing age, technical needs, and usage of elevators in operation today. A Schindler RePair addresses individual components on an as needed basis. A Schindler ReStore targets the electrical system to enable the latest technologies. Alternatively, a ReNew upgrades the critical electrical, and mechanical components, such as the machine, to deliver a smooth, safe and energy-efficient ride. While, a Schindler RePlace introduces a brand new elevator into your existing hoistway.
